

***Skill Development for children Below 12 years***

**WE OPEN UP  
POSSIBILITIES**

# **BRIGHT BRAIN PROGRAMME**

The Abacus program is a Whole Brain Development programme which covers ABACUS, Exercise to Activate Brain and Writing skills

## **PROGRAMME DETAILS**

The only programme which combines Abacus and Exercise techniques for whole brain development

Programme designed by international mentor & facilitator

Instructors are intensively trained by Bright Brain Academy

## HOW IT WORKS

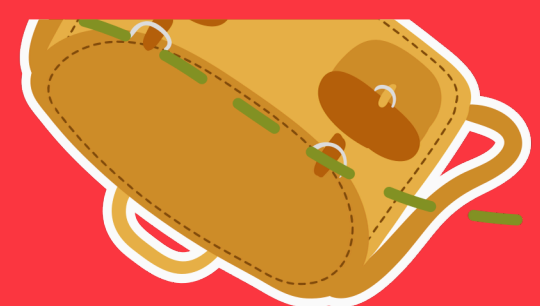

---

Abacus is a calculating instrument with Beads and Rods. Abacus learners are trained to work with the instrument and later visualise the instrument to perform the same calculations. In this process of performing mental arithmetic calculations, they use visual, auditory and sensory inputs to analyse and solve problems. While improving coordination between the left and the right brain, practising abacus regularly also improves visual memory and overall learning ability. These findings are supported by scientific researches done in Japan and China in the mid 90's.

## PROGRAMME BENEFITS

Abacus programme has been designed to help the child

- improve concentration, visual memory, retention & recall
- develop love for numbers
- improve speed & accuracy of arithmetic skills
- enjoy learning and reduce stress
- become more confident resulting in improved learning ability.

# **PROGRAMME DETAILS**

Class 1 & 2 - Beginner level

Class 3 to 6 - Level 1 to Level 8

**As a TEAM it is possible to achieve 100%  
improvement in KIDS**

## **Child Role**

- Kid should attend classes regularly.
- Do Daily practice

## **Parent Role**

- Ensure Kid attends classes regularly.
- Monitor Kids Daily practice
- Follow up child's progress regularly.

## **Teacher Role**

- Conduct classes regularly.
- Motivate Kids to do Daily practice
- Train the child as per training guidelines
- Communicate child's progress regularly.
